

*Manage all your SIM Cards and devices. *Calendar & SMS reminders. *IMSI Manager. *Data Manager. *Data & SMS bundle manager. *Recharge manager. Features: *Automatically add, modify, delete, edit, show, hide and re-hide multiple SIM cards, for easier management. *Assign SIM cards to devices. *SIM cards can be transferred from phone to phone, to simulate a change in SIM card. *Create & modify phone & device categories. *Create & modify phone & device groups. *When selecting a phone & device, SIM manager will detect which SIM card is assigned to it. *Utilizes the IMEI of each SIM card to create a comprehensive database of all your SIM cards and devices. *Create a custom SIM card code for your SIM card. *Create a custom device code for each phone or device. *Add & change data package data (e.g: SMS, Data, Airtime) of each SIM card. *Save & Sync contacts, calendar & SMS between your SIM card, phone and email address. *Create & modify calendar & SMS reminders. *Every calendar & SMS reminder can be assigned to specific SIM card or device. *For calendar reminder: day, week, month, year. *For SMS reminder: priority, sound, text. *Set which SIM card the alarm will be sent to. *Set a daily, weekly or monthly repeating calendar reminder. *Set an alarm to send SMS reminders. *Create & edit calendar & SMS reminders. *Add & edit data package of each SIM card. *You can group every SIM card in a group. *You can link every phone & device category to every group. *When selecting a SIM card, you can pick a SIM card within that category. *You can use SIM manager on tablets also. *You can assign a data package of every SIM card to every device. *Create & modify data package SMS bundle. *Create & modify airtime bundle (data & SMS bundle) of each SIM card. *Set a date for expiry of a data package of a SIM card. *Set a range of dates for expiry of a data package of a SIM card. *Set a daily, weekly or monthly repeating calendar. *Set a daily, weekly or monthly recurring SMS message.

SIM Manager is a simple and powerful program which helps individuals administer all their SIM cards, devices and recharge data. Barcode software is an essential tool for anyone who owns a large volume of documents and wishes to quickly find a desired one. This tool will handle any document (print, Web, Excel, Word, PDF) with a barcode. The program can open more than 100 different document formats (with no changes) and it works just as well as a text. It has tools for desktop search, recognizing text (from text, handwriting, speech, QR codes, bar codes etc.), text splitting, OCR scan and more. It's possible to design a barcode with Microsoft PowerPoint. This means you can use this tool to create professional-looking business cards, identification cards, invoices, posters, parts catalogs, packaging designs, bills, invoices, product catalogs, bus passes, posters or any other printable documents. Barcode software has a list of different types of barcodes: D-Code, EAN, EAN-13, Aztec, Code128, Code39, Code93, QR-Code, Code93-ACM, Code93-CCIT, Code39-ACM, Code93-CCIT, ZF-8, UPC, PDF417, DataMatrix, Interleaved 2 of 5 and Interleaved 2 of 6. This tool can also read envelopes and can be used for postal address extraction and automatic address matching. Barcode software can extract all of the needed information in a simple manner. It also allows the user to sort documents by any field they wish. Barcode software can also import existing documents (PDF, XLS, Word, etc.) and save them as a new barcode. Also, the user can import and export any file format (Bitmap, Jpeg, GIF, PNG, TIFF, TIFF2) as a barcode. The main panel has a list of all the files currently opened, along with their respective information (last modified, creation date, size and file type). In the search panel, you can use multiple search criteria: keywords, regular expressions, text, content and files. This powerful feature makes it possible to search a document even when it has been modified by a different person, which is a major advantage. In the properties panel, you can see the information about the searched barcode. Users can choose to open the b7e8fdf5c8

We are releasing an innovative mobile applications. “SIM Manager” is a simple and powerful program which helps individuals administer all their SIM cards, devices and recharge data. The interface is straightforward and highly intuitive, meaning any type of user can work with this software utility without encountering issues. The main window is split into two sections: one dedicated to adding information and the other to managing it. In order to create a new SIM card entry, you have to input a large number of data, including cell number, country, network, type (prepaid or contract) and IMSI code. Details such as IMEI number, serial number, type (smartphone, cellphone, router, tracker etc.) make and model, are required when trying to add a device. Moreover, you should know you can assign a SIM to devices. This program also lets you add recharges, along with amount, date of expiry and type (data or SMS bundle, airtime), as well as calendar, SMS or e-mail reminders to recharge. All these types of notifications are free, supplied by Google Calendar. This means that if you are interested in setting up these notifications, you should provide a Gmail or Google Apps account. You should know this utility presents a question mark next to each code or piece of information you need to input. By clicking this, you bring up an explanation, so as to find out where a code is. All in all, SIM Manager is an efficient piece of tool which helps you manage your SIM card, devices and set up calendar, e-mail or SMS notifications when you require a recharge. During our tests, no bugs or crashes were revealed. “SIM Manager” Key Features: ✓ You can create new SIM card entries: ● SIM Card: you can input personal data and a password, and add a new IMSI code as well as a SIM. ● SIM Book: you can input information about a book of SIM cards. It includes the same data that is presented on the SIM Card screen. ● Device: you can add up to three devices, just fill in the IMEI number and serial number and choose a network. ● Device Specification: you can add the make and model of a device, along with its date of creation or manufacture, make of the device, firmware version and other relevant details, such as firmware update info, SMS or e-mail reminders, calendar notifications and more. ● Recharge: you can add a

Après plusieurs mois d’attente, le gouvernement italien a décidé de dire non à un projet de loi contesté par le séparatisme régionaliste du sud du pays, estimant que celui-ci ne permettrait pas de résoudre le conflit en Abruzzo. Publicité Lire la suite Si un «séparatisme italien» venait à se réaliser, l'Union européenne devrait l'examiner sérieusement, a annoncé jeudi soir l’Italie. Ce projet de loi incite les habitants des régions italiennes du sud à dénoncer un «simultanéisme italien», inspiré par
